Introduction

Flow-Way is a modern and clean Typst template designed for writing documents, reports or notes. The front page features a sleek design with customizable colors and an optional logo. Each page header displays a line with the title of the current section, enhancing navigation throughout the document.

API Reference

flow-way

- `flow()`

flow

Flow-Way Template

A simple Typst template for creating modern documents, reports or notes with a clean design.

This function sets up the document styles, including fonts, colors, headings, page layout and it is intended to be used with the `#show` statement.

Example Usage:

```
#import "@preview/flow-way:0.1.0: *"

#show: flow.with(
  title: "My Document Title",
  subtitle: "An optional subtitle",
  authors: ("Author One", "Author Two"),
  affiliation: "My Company",
  year: 2025,
  logo: image("path/to/logo.png"),
  toc: true,
  breaks: true
)
```

Parameters

```
flow(
  title: str,
  subtitle: none str,
  authors: str array<str>,
  affiliation: none str,
  year: none int,
  logo: none image,
  lang: str,
  toc: bool,
  toc-depth: none int,
  breaks: bool,
  main-color: str,
  alpha: int ratio,
  body: body
) -> body
```

title `str`

The title of the document.

Default: ""

subtitle `none` or `str`

The subtitle of the document.

Default: `none`

authors `str` or `array<str>`

The authors of the document.

Default: `()`

affiliation `none` or `str`

The affiliation of the authors.

Default: `none`

year `none` or `int`

The year of the document.

Default: `none`

logo `none` or `image`

An optional logo to display on the cover page.

Default: `none`

lang `str`

The language of the document.

Default: `"en"`

toc `bool`

Whether to include a table of contents.

Default: `false`

toc-depth `none` or `int`

The depth of the table of contents.

Default: `none`

breaks `bool`

Whether to insert a page break before each top-level heading.

Default: `false`

main-color `str`

The main color of the template in hex format.

Default: `"003F88"`

alpha `int` or `ratio`

The alpha transparency for secondary elements (0% to 100%).

Default: `60%`

Fonts

The template uses the following fonts:

- **Source Sans Pro** for the body.
- **Barlow** for headings.
- **CMU Typewriter Text** for inline code and code blocks.

The fonts are available under the OFL license and you can find them under the fonts directory of the repository.
